

C-56 Placenta Accreta Spectrum: A Multidisciplinary Approach to Anesthetic Care

Moderator(s)/Facilitator(s): Morgane Factor, M.D., Genevieve Monanian, M.D.

Objective

After completion of this session, the participant will be able to:

- Establish a multidisciplinary plan of perioperative care in placenta accreta spectrum disorders.

Case Stem Question

A parturient with placenta accreta spectrum presents to discuss options for delivery and anesthetic management.

Guiding Questions for Discussion

What are risk factors for placenta accreta spectrum?

What delivery type is appropriate for this patient?

What consultation services should be involved in planning intraoperative care for this patient?

What should the preoperative evaluation consist of for this patient and what should be discussed in the informed consent for this patient?

What are the considerations for anesthetic management?

What are the options for high volume resuscitation?

What postoperative care may be needed for this patient?
